Variable Information

- iso2c: ISO 3166-1 alpha-2; two-letter country code
- edate: Election date
- party: Manifesto Project (Marpor) party code
- pname_en: Party Name (English)
- parfam: Party Family (Marpor)
- challenger: Challenger party
- right_wing_rile_wgt: Economically right-of-centre party
- sps_logit: Welfare services position (Welfare state extension/limitation + Education spending extension/limitation); Logit transformed
- sps_logit_l: Welfare services position (Welfare state extension/limitation + Education spending extension/limitation); Logit transformed; lagged
- welfare_logit: Welfare state extension/limitation position; Logit transformed
- v.max.er_l: Vote share strongest radical right populist party
- multic_pos_logit: Position multiculturalism; Logit transformed
- v: Vote share
- v_l: Vote share at time of manifesto drafting
- g_l: Government status at time of manifesto drafting
- unem.qog_l: Unemployment rate at time of manifesto drafting
- log.immig.pc_l: Immigration rate at time of manifesto drafting
- log.gdp_l: GDP per capita (log) at time of manifesto drafting
- gini_disp_l: GINI index at time of manifesto drafting
- icg_rile: Ideological centre of gravity
- eperiod: Election period
